Hello,

The US EPA has prepared the following information resource:

EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.
EPA Hotline: 844-607-9700 (toll-free)

Comments: We have developed an on-line data portal called Anecdata.org through which a project could be set up for citizens to contribute their observations of what is happening to wildlife, water, etc. We believe that giving citizens a role as scientists will empower them, help them feel involved, and provide real time information for agencies to use. Please consider setting up a citizen science project around this event and let us help. This is a free site that we created for some of our own projects, including a recently funded EPA environmental education project on arsenic in well water.
